## LETTER OF APPRECIATION

Thank you! Martina Beszédesová, Scott Piusz, Ken Zheng, Jones Zhang and Victor Yu of Crown Relocations Shanghai, Sue Bishop (project founder), Parkway Health clinics, JZ School, Staples, Polymax Shanghai Trading Co., Ltd., Squire Sanders and Dempsey L.L.P., City of London Shanghai Rep. Office, A PLEINES MAINS, Wilhelmsen Ships Service, KPMG, Environmental Resources Management, RAJAH & TANN LLP Shanghai Representative Office, German Center, SHERPA'S, KEE Club, Fried Frank, James Estate Wines, Just Beer, The American Chamber of Commerce in Shanghai, The British Chamber of Commerce in Shanghai, The Australian Chamber of Commerce in Shanghai, Shanghai Mamas, Bumps & Babes, Anheuser-Busch Inbev China, Consulate General of Switzerland, and individual donors for contributing 9,448 clothing items and educational toys that are currently benefiting 4,431 Tibetan residents in Mangra and Zeku counties, Hainan and Huangnan Tibetan autonomous prefectures, Qinghai Province, PR China.

Prior to distribution, the poorest families in local communities were chosen by community leaders and volunteers associated with this project, and a list of recipients was made. Clothes and toys were then distributed according to the list. Recipients left their fingerprints to document their receipt of donated items.

On average, an annual income for a family is 363RMB – 4,000RMB per person. Many locals can only afford cheap, poor quality clothes that soon wear-out. Many families have more than six people and parents are responsible for purchasing clothes. This gives much pressure to the parents when it comes to buying clothes for four to five people.

The areas where the clothing was distributed are at high altitude and have five months of cold winter when the average temperature is around minus fifteen degrees consequently, the clothing is very useful. Furthermore, many community kindergartens lack funds to purchase such class necessities as books, sports items, and desks for children.

This project brought warm clothes and education supplies to these marginalized Tibetan communities.

Finally, we extend our sincere appreciation for providing this wonderful gift!

Sincerely,

---

# **INITIAL PROPOSAL**

## **Community Background**

The clothes/education supplies will be distributed in the villages and schools of Guinan County (Hainan Tibetan Autonomous Prefecture, Qinghai Province, PR China). Mangra County is home to 65,474 people (Tibetans = 72.3%). The average elevation of Mangra is 3,100 meters above sea level. Villagers in this area experience five months of winter, which is a barren season for crop production. The average temperature in winter is -15 °C. The average temperature in summer is 24 °C. Herding and farming are key economic activities in seventy-three administrative villages. Herding villages own sheep, goats, mules, horses, and pigs. Farming villages cultivate barley, wheat, rapeseed, and potatoes. On average, villages cultivate forty to 467 hectares of cropland (0.34 to 2.68 hectares per family, which on average consists of six members). The average annual cash income per person is 363.40 RMB. Locals earn cash by selling livestock, sheep wool, butter, cheese, and caterpillar fungus.

Many communities lacked schools, especially in pastoral areas. Currently, 98% of locals aged fourteen to eighty are illiterate. Many locals are eager to have their children finish school and have a better life. Locals admire people who have jobs with dependable salaries, however, many parents find it difficult to meet schooling fees when their children begin attending senior middle school (1,300 RMB to 1,900 RMB annually in 2009), and college (4,000 RMB to 5,000 RMB annually in 2009). Consequently, children often stay at home helping families plow, seed, weed, harvest, and herd yaks and sheep.

As local government implemented policies in resettlement planning, grassland division, and livestock reduction, local family income was reduced and many locals had to give up a traditional lifestyle. More than thirty communities in Guinan were resettled beginning two to twenty years ago. Many were resettled near local towns. None of these community members were given job training prior to resettlement. Lacking knowledge of the Chinese language combined with absolute illiteracy, means that many locals find it difficult to make a living. On average, ten families per village (mostly elderly people and children) lack adequate food, living expenses, and money for basic medical and clothing expenses. Especially women stay at home doing family chores.

## **Problems and Solution**

A recent local government policy moves each local village primary school students (grade one to six) to local county township town center schools. This left many village primary school classrooms empty, with no chairs and desks. The policy encourages local communities to establish independent kindergartens for appropriately aged children. These communities lack funds, thus most schools in Guinan County are without pre-elementary education programs. Recently, the government and some locals established about 12 kindergartens across the county, but many of them lack of basic education supplies. Students find it extremely difficult to catch up with study when they directly come to grade one, find teaching to be boring with dry textbooks, plus the teaching quality is poor—most classes are teacher centered.

Many community kindergartens lack funds to purchase such class necessities as children's books, sports items, and desks. Consequently, many children are misguided and find school and textbooks to be boring due to a poor study environment.

Providing education supplies to the kindergarten and primary schools would immediately benefit the local children.

Due to low family income, many locals only can afford very cheap and poor quality clothes that soon become worn-out after a short time. Many families have more than six people and parents are responsible for purchasing clothes. This gives much pressure to the parents when they buy clothing for four to five people at the same time. This clothes project would directly benefit these villagers relieving their economic pressure.

### **Implementation**

Friendship Charity Association (FCA) ([www.friendshipcharity.org](http://www.friendshipcharity.org)) will be responsible for implementing this project. FCA will provide a truck to directly transport the clothes and education supplies from Xining to the local areas in Guinan County. FCA will provide photos and description to submit a detailed final report after the completion of the project.
